

Toasted Sandwich

1. Using a chopping board and sharp knife, cut the crust off.

2. Butter one side of each slice of bread.

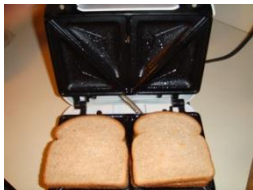

3. Turn on the sandwich maker. When the light is **green**, it is ready. Turn one slice of bread butter side down. Place ingredients onto the bread.

DO NOT OVER FILL!

4. Put the other slice of bread on top, butter side up. Using a fish slice place into the sandwich maker.

IT IS VERY HOT !

5. Keep a watch on the maker. Once they look like this, take out using a fish slice.

6. Turn the sandwich maker off. While it is cooling down, tidy the kitchen. Once the sandwich maker is cool, clean it.
